## SUMMARY

---

- Passionate Flutter Developer with 4+ years of experience in mobile and web app development.
- Expertise in building high-performance Android, iOS, and web applications using Flutter.
- Skilled in Firebase, REST APIs, WebSockets, and third-party integrations.
- Strong problem-solving ability with a focus on scalable architecture and optimized performance.

## Education

---

Global Institute of Technology and Management, Gurugram, B.Tech (Computer Science)	Aug 2015 – Apr 2019
Colonel Public School, Gurugram, —12th	Mar 2014 - Mar 2015
Mother khazani Public School, Delhi, —10th	Mar 2012 - Mar 2013

## Experience

---

<b>Senior Flutter Developer</b> , Viral Pitch Technologies Pvt. Ltd.	March 2022 – Present
<ul style="list-style-type: none"><li>• Led development and maintenance of cross-platform applications (Android, iOS, Web) using Flutter.</li><li>• Successfully implemented 5+ apps on the Play Store / App Store and hosted 2 websites on Firebase.</li><li>• Architected Viral Pitch, an influencer marketing platform for brand-influencer collaboration.</li><li>• Developed VP Chatbox, a real-time messaging platform using WebSockets and Firebase.</li><li>• Implemented GetX and Provider for efficient state management.</li><li>• Integrated Google, YouTube, Facebook, Apple Sign-In and Facebook Events for analytics.</li><li>• Implemented deep linking using Firebase Dynamic Links to improve user navigation and app engagement.</li><li>• Designed and optimized push notification systems using Firebase Cloud Messaging (FCM).</li><li>• Enhanced app performance and stability with Firebase Analytics, Crashlytics, and Remote Config.</li></ul>	
<b>Flutter Developer</b> , Flyweis Technology.	Sep 2021 – Jan 2022
<ul style="list-style-type: none"><li>• Designed and developed responsive cross-platform apps using Flutter.</li><li>• Integrated REST APIs, Firebase services, and third-party libraries.</li><li>• Optimized app performance and deployed applications on Play Store.</li><li>• Enhanced app performance and stability with Firebase Analytics, Crashlytics, and Remote Config.</li></ul>	
<b>Flutter Developer Intern</b> , P2L Impact Learning Technology.	Jan 2021 – Aug 2021
<ul style="list-style-type: none"><li>• Experienced in hybrid app development with Flutter.</li><li>• Skilled in Swift for native iOS app development.</li><li>• Strong debugging and testing capabilities for optimized performance.</li><li>• Hands-on experience in deploying applications on the Play Store and App Store.</li></ul>	

## Projects

---

<b>Viral pitch (Android and IOS)</b>	<b>Links:</b> Playstore   Appstore
<ul style="list-style-type: none"><li>• Viral Pitch is a Self-Serve Influencer Marketing Platform that connects brands with social media influencers through a unified dashboard. The app enables influencers to collaborate with reputed brands and run marketing campaigns across platforms like Facebook, Instagram, YouTube.</li><li>• Real-time campaign briefs from 100+ brands for Paid, Barter and Free Product Sampling campaigns.</li><li>• Detailed analytics for influencer posts to track campaign performance.</li></ul>	

- Social media authentication via Google, YouTube, Facebook, and Apple Sign-In
- Push notifications for real-time campaign updates.

#### **Technologies Used:**

- Language: Dart
- Backend: REST API
- State Management: GetX,Provider etc
- Authentication: Firebase Auth (Google, Apple, YouTube, Facebook Sign-In)
- Analytics and Performance: Firebase Analytics, Firebase Performance, Firebase Remote Config
- Database and Messaging: Fire store, Firebase Cloud Messaging (FCM), Firebase Dynamic Links
- Crash Reporting: Firebase Crashlytics
- Facebook Events for analytics.

#### **Vp Chatbox(Android,IOS,web)**

**Links:** [Playstore](#) | [Appstore](#) | [Website](#)

- VP Chatbox is a real-time communication platform designed for brands and influencers to collaborate efficiently. It simplifies influencer marketing by enabling direct communication, content collaboration, and campaign discussions, streamlining the entire process.
- Instant messaging between brands and influencers for seamless collaboration..
- Push notifications for real-time message alerts and campaign updates.
- End-to-end encrypted conversations ensuring secure communication.
- Socket-based APIs for real-time messaging.
- Firebase integration for authentication, analytics, and messaging.

#### **Technologies Used:**

- Language: Dart
- Backend:REST API and WebSockets
- State Management: GetX,Provider etc
- Authentication: Firebase Auth (Google and password)
- Database and Messaging: Firestore, Firebase Cloud Messaging (FCM), Firebase Dynamic Links
- Crash Reporting: Firebase Crashlytics

#### **Lead IQ (Android,Web)**

**Links:** [Playstore](#) | [Website](#)

- Lead IQ is a lead management platform designed for agents, freelancers, and professionals to monetize leads, track progress, and manage commissions effortlessly.
- Effortless Lead Submission – Submit leads or join campaigns for maximized earnings.
- Real-Time Tracking – Monitor lead status and commission progress.
- Commission Management – Secure withdrawal and detailed earnings reports.
- Instant Notifications – Get updates on lead status, payments, and new opportunities.
- Comprehensive Insights – Performance reports for lead tracking and earnings analysis.

#### **Technologies Used:**

- Backend: REST API
- State Management: GetX,Provider etc
- Analytics and Performance: Firebase Analytics, Firebase Performance, Firebase Remote Config
- Database and Messaging: Fire store, Firebase Cloud Messaging (FCM), Firebase Dynamic Links
- Crash Reporting: Firebase Crashlytics

## TECHNICAL SKILLS

---

- **Languages:** Dart, JSON
- **Tools and Platforms:** Firebase, REST APIs, WebSockets, Git
- **State Management:** GetX, Provider
- **Operating Systems:** Windows, Linux, iOS
